La SEDCA asesora a GSD en cuestiones relacionadas con la nutrición, revisa menús y realiza la valoración de los platos. En este menú se indican las kilocalorías y macronutrientes (en gramos) de una ración media aproximada.

Alérgenos: 1-Gluten, 2-Crustáceos, 3-Huevos, 4-Pescado, 5-Cacahuetes, 6-Soja, 7-Leche, 8-Frutos secos, 9-Apio, 10-Mostaza, 11-Granos de sésamo, 12-Sulfitos, 13-Altramuces, 14-Moluscos, T-Trazas

Pautas para una cena equilibrada

- La cena debe ser una comida completa, pero ligera, para favorecer un descanso reparador y contribuir a la ingesta adecuada de energía.
- Constará de un primero, un segundo y un postre.
- Debe complementar el resto de las ingestas del día, por lo que deberá estar compuesta por grupos de alimentos que no se hayan consumido en la comida.
- Se recomienda que los alimentos no sean ricos en grasas para facilitar el descanso posterior.
- El agua debe ser la bebida de elección frente a zumos o refrescos.
- Una dieta equilibrada debe ser variada para poder asegurarnos un buen aporte de todos los nutrientes.
- Es recomendable ingerir alimentos frescos y de temporada, favoreciendo el consumo de frutas, hortalizas y legumbres.
- Es importante realizar entre 4 o 5 comidas al día, intentando no saltarnos una de las más importantes, el desayuno.
- No podemos olvidarnos de incluir el ejercicio físico como complemento a una alimentación equilibrada.

Menús especiales

Los menús especiales son: **Sin gluten, sin huevo, sin leche, sin legumbres o sin pescado.**

En estos menús se eliminan o sustituyen aquellos productos o platos que sean o contengan estos alimentos.
